

Backup Power Policy of GIFT Power Company Limited

1. Consumers having business such as Data Center, Hotel, Hospital which require 100% back up power are allowed to create their own backup power infrastructure at their own premises as per their own requirement at their own cost. GIFT PCL will check only statutory compliance of the installations.
2. GIFT PCL can develop centralized or cluster centric LT DG set infrastructure for backup power based on consumer backup power demand, if found technical feasible.
3. To avail the facility of DG backup power, consumer is required to apply for the same.
4. Capital expenditure for backup power arrangement will be incurred by GIFT PCL and the same will be recovered proportionately from consumers availing backup power facility based on contract demand.
5. Operation and maintenance of backup power arrangement will be done by GIFT PCL and O&M cost will be recovered proportionately from consumers availing backup power facility based on contract demand.
6. Recovery of Capex and O&M cost for backup power arrangement is based on sharing of actual cost of development and running the infrastructure. Policy is based on No-profit No-loss principle.
7. All environmental related compliance shall be done by GIFT PCL for centralized LT DG infrastructure.
8. No SLA are signed with any consumer, however regular testing of backup power system is carried out in presence of consumer's representative.
9. Recovered capital expenditure cost is one time cost and non-refundable.
10. Contract demand of backup power shall not be reduced before 2 (two) years from the date of release of backup power.

11. In case of reduction of backup power contract demand, the same capacity may be allotted to other demand. In case of extension of backup power demand once again, consumer has to apply afresh and follow process for new demand.
12. In case of reduction of backup power contract demand, capital expenditure cost shall not be refunded, but O&M cost will be reduced proportionately to new backup power contract demand from approved date.
13. If consumer is shifting the location of premises within GIFT city, only cost of connecting the new infrastructure shall be charged from existing consumer. If consumer is shifting out of the GIFT city, capital infrastructure cost shall not be refunded.
14. Capital expenditure cost shall be reviewed from time to time based on actual cost incurred in development of infrastructure and the same shall be revised after due process of approval from competent authority.
15. O&M cost shall be reviewed annually, based on actual expenditure and the same shall be revised after due process of approval from competent authority.
16. The following are the details of the charges for the year 2020-21:
 - a. Capital cost of LT DG backup infrastructure is Rs. 16,050/- per kVA (in DTA area) and Rs 13,600/- per kVA (in SEZ area).
 - b. Monthly fixed O&M cost of DG backup system excluding GST is Rs. 88/- per kVA.
 - c. Monthly fuel cost (variable cost) will be recovered from consumer based on actual DG running hours. The variable cost will be divided proportionately among the consumers depend upon their backup power demand.
